Dear Vilma Yel:

I am truly grateful for the opportunity to formally thank Edu Music; in particular Mr. Kenny Graves for all the hard work and dedication that was put in to working with the children at Astoria Blue Feather Head Start. Mr. Kenny was able to provide 16 fun-filled music and movement sessions to our children and they were able to learn academic concepts as well as increase their receptive and expressive language, their spatial awareness, their social skills and their love and appreciation for music and movement. All his hard work was showcased on the day of the Parent Presentation. I was humbled and dumbfounded at the active participation from all children, staff and families during this beautiful presentation. I am looking forward to having Mr. Kenny back next year! Mr. Kenny has a true understanding of children and is able to work with children of various abilities and it is a gift that he has shared with our children and staff and that I am looking forward to have our children experience next year when our school transitions from having typically developing children from the community to all children with special needs. Congratulations Edu Music for providing children with one of the best and most rewarding experiences ever!
